DETAILED ACTION

This Office action is in response to the amendment filed June 20, 2003.

1. The rejection under 35 U.S.C. 102(e) as anticipated by OHSAWA et al or TACHIKAWA et al is **withdrawn** in view of the amendment by applicant which more specifically recites the strong acid to be a sulfonic acid represented by the formula as seen in claim 1.

2. The rejection under 35 U.S.C. 103 (a) as unpatentable over OHSAWA et al or TACHIKAWA et al in view of SCHWALM et al is also **withdrawn** in view of the amendment by applicant.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 53-61 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,2,5,7,14,18,27,28,30,32-35,38,40,42,43,45 and 46 of U.S. SN 09/933,884 that was allowed September 2003 and is soon to be a U.S. Patent. Although the conflicting claims are not identical, they are not patentably distinct from each other because the imageable composition comprising an acid curable composition, an acid generator, a strong acid, and an infrared absorber or photothermal converter claims the same ingredients as

Art Unit: 1752

recited in radiation sensitive composition of 09/933,884, though it may be recited in a different manner. A grant to the current application would improperly extend the grant to the same invention.

5. Claims 1-8,10-25,27-34,37-52 are allowed.

None of the prior art references of record disclose the claimed imageable composition and the method of producing an imaged element as recited in those claims.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
